Comparison of e-book readers

An **e-book reader**, also called an **e-book device** or **e-reader**, is a portable electronic device that is designed primarily for the purpose of reading digital books and periodicals.

An e-book reader is similar in form to a tablet computer. A tablet computer typically has a faster screen capable of higher refresh rates which makes them more suitable for interaction. The main advantages of e-book readers are better readability of their screens especially in bright sunlight and longer battery life. This is achieved by using electronic paper technology to display content to readers.

Any device that can display text on a screen can act as an e-book reader, but without the advantages of the e-paper technology.

The larger Kindle DX with a Kindle 2 for size comparison

Commercially available devices based on electronic paper

Devices sold directly by the manufacturer

Maker	Model	Intro year	Screen size (inch)	Weight	Screen pixels	Screen shades	Operating system	Touch screen stylus	Wireless network	Text-to-speech	Integrated dictionary	Directory organization	Internal storage	Card reader slot	Replaceable battery	Web browser	Library compatible

This list is missing many of the 1st and 2nd generation e-reader devices from the 1990s to 2005.

This list can be expanded by adding Unicode support information for e-readers. Such information is very difficult to find right now.

Rebranded devices

- Hanlin V3 → BeBook (EU): BeBook, Koobe (HU), Astak EZ Reader (US), Lbook (UA) Papyre (Spain)
- Netronix EB001 → Astak Mentor EZ Reader, Cybook Gen3 (200 MHz version)
- Netronix EB600 → Cool-er, eClicto, Elonex eBook, eSlick, Astaka Mentor EZ Reader, Cybook Gen3 (400 MHz version),
- Condor eGriver touch → Medion OYO, Prestigio PER5062B, Icarus Sense, Pandigital Novel 6" Personal eReader, Qisda QD060B00

Announced devices or prototypes

- Adam by Notion Ink (Shipped January 2011)
- txtr, (October 2009), 6 inch reader from Wizpac
- Readius by Polymer Vision (Autumn 2008) UPDATE: Polymer Vision filed for Chapter 11 bankruptcy in July 2009. This ebook reader will not be coming to market in its current form.
- eDGe, dual screen, by enTourage (Available since April 2010)^[49]
- Slate, 8.9 inch screen, by Hewlett-Packard (June–September 2010)^[50]
- E6 Slider, 6 inch reader, by Samsung (Spring 2010)^[51]
- Samsung E61 with QWERTY design (early 2010)^[52]
- Takeop - an eBook project by Mircea Batranu (proj-2007/ prez-2009)^[53]

Devices using an LCD screen

- NotionInk Adam using 10.1" Pixel Qi display w/ Matte Coating: Transmissive, transfective, and reflective color/B&W Multi-touch
- PocketBook IQ 701 using 7" TFT LCD color touchscreen
- ECTACO jetBook using a 5" 16-grayscale TFT Transfective screen
- Nook Color is an Android tablet, branded "e-book reader" by its retailer, the bookstore Barnes & Noble.

Discontinued models and products

- eSlick by Foxit Corp., discontinued in late 2010^[54]
- QUE proReader by Plastic Logic^[55]
- Cybook / Cybook Gen1 Sold by Cytale (1998–2003) then by Bookeen (2003–2007), now replaced with the Cybook Gen3 and the Cybook Opus
- Franklin eBookMan - 1999(?)–2002 (last model)

Other mobile text viewers

Some portable multimedia players and smartphones include a text viewer, e.g. several Cowon players, including the Cowon D2 and the iAUDIO U3 and Mobipocket Reader for Symbian OS and Windows Mobile mobile phones and devices. Adobe Reader mobile also turns Windows Mobile devices (for example, Samsung Omnia) into suitable e-Book viewers. Apple's iPhone, iPad^[56] and iPod Touch are also acquiring status as e-book readers through a variety of e-reader apps. WordPlayer, FBReader or Aldiko turns Android phones into e-book readers. PalmOS based devices and smartphones are also usable for reading books. PalmOS supports PalmDoc, iSilo, Mobipocket reader, PDF, HTML conversion, text format, Handstory, TealDoc among many other software titles, in addition to on-the-device word processing.

There are also mobile devices capable of wordprocessing. Conversely, fully functional tablet notebooks (with screens that turn 180 degrees and lie with the back to the keyboard) and subnotebooks are used as e-book-readers.

A Symbian OS smartphone used as an e-book reader
